

COMMERCIAL & INDUSTRIAL ADVANCED LIGHTING PROGRAM

PURPOSE

The Commercial & Industrial Advanced Lighting Program is an energy efficiency program that encourages commercial and industrial members to install high efficiency lamps and ballasts in their facilities.

AVAILABILITY

This program is available to commercial and industrial facilities located in all service territory served by Owen Electric Cooperative.

ELIGIBILITY

To qualify for the Commercial & Industrial Advanced Lighting Program the customer must be on a retail commercial or industrial rate. The business must have been in operation for at least two years prior to completion of the lighting retrofit. The member must also be current on its power bill payment to Owen Electric Cooperative. No empty buildings, inactive warehouses, or inactive storage areas shall qualify. The business must be open or have its normal lighting load active for at least 50 hours per week.

REBATE

Owen Electric Cooperative will provide an incentive to the member at a rate of \$213 for each kW of lighting load reduction for businesses open 50 hours a week or more. For commercial members, rebates to members are limited to \$6,000 per year for any facility. For industrial members, rebates are limited to \$12,000 per year for any facility.

TERM

The Commercial & Industrial Advanced Lighting Program is an ongoing program.

VERIFICATION PROCEDURE

Qualifying lighting must be identified or documented by Owen Electric Cooperative staff prior to retrofitting. After the customer completes the retrofit, Owen Electric Cooperative staff must verify the installed lighting retrofit. Demand and energy savings will be calculated based on lighting information gathered during the visits. Owen Electric Cooperative personnel will utilize the manufacturer's lighting fixture specifications and known measurements to calculate the savings: rebates under this tariff will be paid after these verification procedures are complete.

QUESTIONS & ADDITIONAL INFORMATION
